

2019 A Year in Review

20 Year Anniversary of Advantra®

Advantra® Warrior™ continues to raise the bar for food packaging and superior adhesive performance.

Preserving Scientific Artifacts

The Science Museum of Minnesota's Triceratops remains one of the museum's most prized possessions, and stands as one of many examples of how we're using high-tech innovations to help preserve scientific artifacts.

Sustainable Drinking Practices

With an estimated 8.3 billion straws polluting the world's beaches, our food safe solution helps maintain straw integrity while consumers enjoy their beverages.

REACH Advocates in the European Union

We are passionate about continuing to take actions that ensure our products are safe for the environment, our customers, consumers and our colleagues.

ADAS for the Automotive Industry

Our ever-expanding lineup of engineered adhesive solutions can meet the evolving needs of device performance and production efficiency, including cameras, radar, lidar, lane departure and ACC.

Automated Adhesive Delivery

In 2019, we launched our Industry 4.0 solution, FreeFlow™ Automated Adhesive Delivery System helping manufacturers make informed business decisions in real-time.

Helping E-grocers Tackle Concerns

Our unique packaging innovations make online grocery shopping more attractive for both retailers and consumers by reducing packaging weight, right-sizing packages, and protecting products from damage.

Fit-to-Purpose Packaging

We are able to collaborate with customers at the testing and design stages, while developing adhesives solutions for fit-to-purpose packaging to meet their expectations, reducing wasted packaging.

Energy Efficient Reactive Thermoplastic Spacer

Kodispacer 4SG is currently the only reactive thermoplastic spacer system available for manufacturing, energy-efficient windows.

Post and Pole Installation

Our post and pole installation products and applications for the building and construction industry are designed to quickly and effectively help contractors, technicians and DIYers better set poles and posts. Within 15 minutes, installers can mount brackets, start building a fence, a deck, or begin installing hardware.
